

Video: A Comprehensive Overview of Value Stream Mapping

Philip from Enna here. Today we're taking a first look at Value Stream Mapping. We will be covering all things VSM, from definitions and tools, to current and Future State Mapping, including objectives.

And in the true spirit of Value Stream Mapping, this course will be delivered with only the most concise language in order to reduce the time you spend learning the subject and maximize the time you spend creating and using your own Value Stream Map!

Using active learning methods, we will analyze our production processes and service methods to reveal all the work involved – be those Value-Added or Non Value-Added – that are required to transform a customer request into a delivered final good or service.

This is a great start for beginners to get the information and direction needed to start mapping out their Value Stream.

Those already experienced in Value Stream Mapping can also benefit from the structured approach offered here and use these techniques to double check the coverage of their existing Value Stream Maps.

Thank you for joining us on this exciting journey of discovery and transformation! 📺
